Covid Vaccination - Collated Information for Patients

Tracking your immunisation history:

➤ Please go to the **myGov website** and download the app onto your phone.

You can access the website [here](#).

You can set up a myGov Generator, instructions are located [here](#).

➤ Please add **Medicare** to your services on myGov.

You will need to answer all questions correctly for this to work. Allow 24 hours for the app to update

To download your **immunisation statement**:

- Go to myGov
- Open Medicare
- Click on Immunisation History
- Click on View Statement
- Click on View History Statement (PDF)
- Download

To check your eligibility use the Australian Government Department of Health Vaccines Eligibility Checker [here](#).

You may be required to complete an eligibility declaration. The official Covid-19 vaccination eligibility declaration form can be located [here](#).

The practice administering your vaccination may require you to complete a written consent form. The official Covid-19 consent form can be located [here](#).

The Australian Government has a website dedicated to Covid-19. That website can be located [here](#).

Information on Covid-19 AstraZeneca Vaccine can be located [here](#)

Please tell the clinician who administered the vaccine if you have side effects as we are required to report them. Further information can be found [here](#).

If you are asked to report the adverse event yourself, the form can be located [here](#). Once the form is complete, it can be sent to COVID_AEFI@health.qld.gov.au

We currently will not be getting enough vaccines to service our patients and the broader community and we understand you may need to attend a respiratory clinic for your vaccination. You may be requested to provide a health/medication summary from your regular GP. If this is the case please book a Telehealth visit with your GP as these cannot be issued on an ad-hoc basis.

Once you have the document, please keep it very safe as there may be a fee to have it reissued.
